

Programme des journées d'Arles GDR CELLTISS

Jeudi 22 /11

11h25 :	Ouverture
11h30 – 12h00 :	Pierre Bongrand "Adhésion cellulaire"
12h00 – 12h30	Karsten Kruse , "Self-organization in systems of treadmilling filaments"
<i>Repas</i>	
14h – 15h40 :	20 mn Thomas Crouzier , "Myoblasts adhesion, proliferation and differentiation on polyelectrolyte multilayer films of controlled stiffness" 20 mn Sylvie Dufour , "Uncoupling p120ctn from E-cadherin regulates cadherin-mediated intercellular adhesion strength by actin reorganization" 20 mn Jean-Louis Martiel , "Bead motility mediated by bundles of actin filaments capped by mDia1." 20 mn Nancy Guillen , "Elucidation of cellular and molecular mechanisms powering Entamoeba histolytica motility during human amoebiasis" 20 mn Alice Nicolas , "L'adhésion focale, une sonde de l'environnement mécanique des cellules"
15h40 – 16h30 :	Discussion avec les institutionnels (B. Fourcade et JP Henry)
<i>Pause café</i>	
17h – 18h 30 :	Séance Poster

Vendredi 23 /11

8h30 – 9h00 :	Gregory Giannone "Vers une biomécanique de la migration"
9h00 – 9h20	Catherine Tardin "Non equilibrium mechanics and stress fluctuations in the motor activated cytoskeleton"
9h20 – 9h40	Delphine Arcizet "Force-induced modifications in in-vitro cultured cells"
9h40 – 10h10	Pierre Desbiolles "Interactions moléculaires du vivant : approche expérimentale molécule unique"
10h10 – 10h30	Paolo Pierobon "Single molecule detection of Myosin V in living cell"

Pause café

11h00 – 11h20 :

[Evelyne Coudrier](#)

"Différents moteurs moléculaires transportent les endosomes précoces et les endosomes tardifs"

11h20 – 11h50

[Xavier Darzacq](#)

11h50 – 12h10

[Hervé Isambert](#)

"Evolution et topologie des réseaux biologiques "

Photo de groupe

Repas

15h20- 16h20 :

[Joe Howard](#)

16h20 – 16h40

[Vincent Hakim](#)

"Deriving structure from evolution: segmentation (in silico)"

16h40 – 17h10

[Thomas Lecuit](#)

développement tissus

Pause café

17h30 – 19h

Séance poster

Samedi 24 /11

8h30 – 8h50

[Sébastien Courty](#)

"Analysis of the spatial regulation of the cell cycle by quantification of 2D cellular pattern dynamics during tissue morphogenesis"

8h50 – 9h10

[Zoher Gueroui](#)

"Examining how the spatial organization of chromatin signals influences metaphase spindle assembly"

9h10 – 9h 40

[Laurence Salomé](#)

"Membranes biologiques : vers un modèle physique"

9h40 – 10h00

[Victor Rouiller](#)

"Micelles hybrides fluorescentes et magnétiques : des sondes bioactivables pour l'imagerie"

10h - 10h20

[Ana-Maria Sfarghiu-Trunfio](#)

"The superior lubricant properties of phospholipid bilayers "

Pause café

10h40 – 11h00

[Juan Pelta](#)

"Transport de protéines partiellement dépliées à travers un nanopore"

11h00 – 11h30

[Thierry Galli](#)

"TI-VAMP vesicles, microtubule and actin networks network underlie neurite growth: mathematical modeling of the contribution of exocytosis and the cytoskeleton in neurite growth"

11h20 :

Clôture
