

# Génération de bulles de savon dans un écoulement

Omar Zepeda Arceo, Anne Cros  
Departamento de Física  
Universidad de Guadalajara

Détachement d'une bulle au cours du temps. Anneau de diamètre moyen  $D_{out} = 4,1$  cm.  
La vitesse de l'air est  $v = 2,45$  m/s.

L'intervalle de temps entre chaque image est  $\Delta t = 48$  ms
